

SOMMA E  
UNITÀ FRAZIONARIA

C'è la somma dei due segmenti e il loro rapporto

$$\begin{array}{l|l} \overline{AB} + \overline{CD} = 40 \text{ cm} & \overline{AB} = \\ \overline{AB} = \frac{3}{5} \overline{CD} & \overline{CD} = \end{array}$$

$$\begin{aligned} U &= (\overline{AB} + \overline{CD}) : 8 = \\ &= 40 : 8 = 5 \text{ cm} \\ \overline{AB} &= U \times 3 = 5 \times 3 = 15 \text{ cm} \\ \overline{CD} &= U \times 5 = 5 \times 5 = 25 \text{ cm} \end{aligned}$$

$$\overline{AB} + \overline{CD} = 72 \text{ cm} \quad \left| \begin{array}{l} \overline{AB} \\ \overline{CD} \end{array} \right.$$

$$\overline{AB} = \frac{4}{5} \overline{CD}$$

$$U = (AB + CD) : 9 = 72 : 9 = 8 \text{ cm}$$

$$AB = U \times 4 = 8 \times 4 = 32 \text{ cm}$$

$$CD = U \times 5 = 8 \times 5 = 40 \text{ cm}$$
